

Medium Duty Automatic Boom Gate , 7S-11S Boom Parking Barrier

Our Product Introduction

for more products please visit us on turnstilebarriers.com

Basic Information

- Place of Origin: China
- Brand Name: SEWO
- Certification: CE ISO9001
- Model Number: SEWO-DZ300B
- Minimum Order Quantity: 1 pc
- Price: Negotiable
- Packaging Details: wooden box
- Delivery Time: 5-7 working days
- Payment Terms: T/T, Western Union, MoneyGram, L/C, D/A, D/P
- Supply Ability: 2000 sets per month

Product Specification

- Product Name: Medium Duty Boom Barrier
- Boom Length: 3M, 4.5M, 6M (Including Housing)
- Power: 220V±10%,50/60HZ
- Speed: 7S-11S
- Working Temperature: -40C °- 70C °
- Motor Power: 200W
- Remote Control Distance: ≥ 30M
- Housing Size: 460*330*1380MM
- Usage: Road Traffic Safety, Parking Lots/toll Gate/highway/expressway/freeway/railway Crossing
- Highlight: Medium Duty Automatic Boom Gate,
7S Boom Parking Barrier,
11S Boom Parking Barrier

Product Description

Automatic Medium Duty Boom Barrier Gate High Performance 200w Strong Arm Motor parking Equipment

Discriptions of Heavy Duty Barrier Gate:

Heavy Duty Boom Barrier refers to a robust and sturdy type of barrier used for traffic control and access management. It is commonly employed at locations such as parking lots, toll booths on highways, and entrances to important facilities. This type of boom barrier is designed to withstand frequent use and endure significant impact. Typically made of steel or other durable materials, it possesses features such as compression resistance, shock resistance, and corrosion resistance. Moreover, it is equipped with a powerful motor and gear transmission system to ensure fast, stable, and reliable operation of the boom arm.

The working principle of a heavy-duty boom barrier involves the activation of an opening command by an operator or an automated license plate recognition system when a vehicle needs to pass. The boom arm quickly lifts or lowers to allow vehicle access. When there is no vehicle passing through, the boom arm remains closed, effectively restricting unauthorized vehicle entry.

In addition to the fundamental lifting and lowering function, some heavy-duty boom barriers are equipped with additional safety features such as collision prevention devices, infrared detectors, and anti-tampering systems to enhance security and protection.

In summary, a heavy-duty boom barrier is a reliable, secure, and durable device that plays a vital role in traffic control and access management.

Features of Heavy Duty Boom Barrier Gate:

Strength and Durability: Heavy duty barriers are constructed using strong materials. They are designed to withstand attempted breaches, ramming attacks, or forced entry attempts.;

Height and Size: Heavy duty barriers are often taller and wider than standard barriers, providing an imposing physical presence to deter potential intruders. The height and size of the barrier can be customized based on the specific security requirements of the location.

Physical Resistance: Heavy-duty barriers are built to offer a high level of resistance against unauthorized vehicles and individuals. They are capable of stopping and immobilizing vehicles even at high speeds, preventing unauthorized access.

Weather Resistance: Heavy-duty barriers are designed to withstand various weather conditions, including extreme temperatures, high winds, rain, and corrosion. They are coated or treated to ensure long-lasting performance in challenging environments.

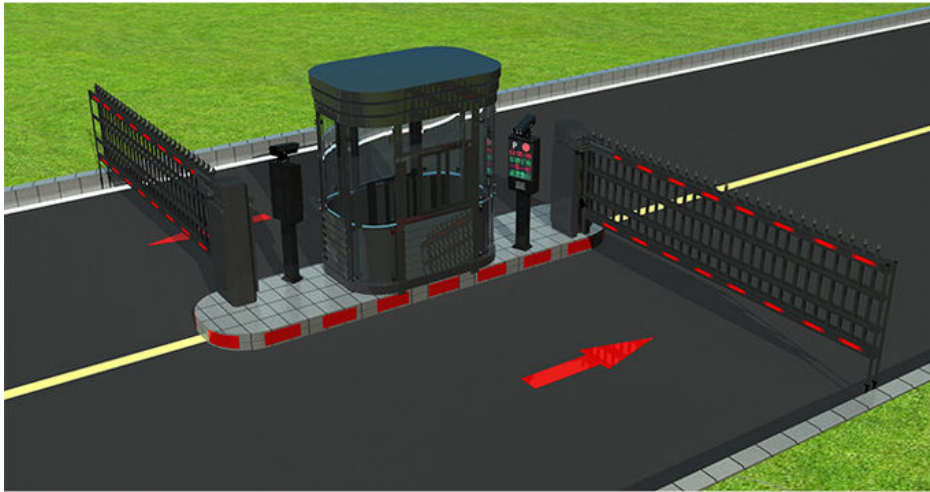

Integrated Security Systems: Heavy-duty barriers can be integrated with various security systems to enhance their effectiveness. These may include vehicle access control systems, surveillance cameras, intrusion detection sensors, or biometric authentication systems. For example, CP5 ALPR Parking System, CP9 ALPR Parking System, T9 Parking Management System or T800 Parking Management System.

Specifications of Heavy Duty Boom Barrier Gate:

| | |
|------------------------------------|--|
| Product Name | Medium Duty Boom Barrier (Anti climbing) |
| Model No. | SEWO-DZ300B |
| Speed | 7S-11S |
| Power Supply Voltage: | 220V+10% , 50HZ |
| Motor Power | 200W |
| Working Temperature | -40C °- 70C ° |
| Barrier length | 3M, 4.5M, 6M (Including housing) |
| Maximum length (including housing) | 6M |
| Barrier arm height | 1.63M |
| Housing size | 460*330*1380MM |
| Remote control distance | ≥ 30M |

Applications:

Advertising boom barriers are commonly used at toll plazas, parking lots, bus terminals, train stations, airports, parks, recreational areas, tourist attractions and entrances/exits of public and private facilities.

FAQ

1, What is the strength of your company in this industry?

Our company pays much attention to bringing and developing new technique and products since the foundation in 2003. Our brand "SEWO" has ranked among the top 10 famous brands of car parking systems and facilities in China.

2, What is the advantage products of your company?

Shenzhen Sewo Technology Ltd. is a professional high-tech enterprise, which integrates the development, manufacturing, marketing, and service of Smart Parking Management System, Flap Barrier, Tripod Turnstile, Swing Gate, Parking Guidance System, Barrier Gate, Parking Lock, Access Control Systems and other related security products.

3, How about the quality of your product?

With our exquisite technology and strict quality testing system, we passed "CE" and "ISO9001:2008" international quality assessment standards. Our company also has won many honors, such as "China Top 10 Parking Management System Supplier", "AAA grade quality, service and prestige enterprise in China", and so on. Professional R&D team has strong capacity to be committed to continuously creating high quality products and service.

4, How about some customization request?

We support OEM / ODM service , more than 20 years industry experience will bring appropriate design for you, no only products, but also a smart access management solution expert.

5, Do you have agency for after-sales service?

Any question about products , you can find our sales anytime. We will provide life-time technology support. We have established many branch offices and gained much agents at home. Our sales and service network spreads all over the world. We also have extensive sales channels in Southeast Asia, the Middle East, Africa, Europe, and America. We warmly welcome customers or agents all over the world to join us to construct an intelligent , safe, convenient and harmonious society.

6, How about the delivery time?

Regular products need 5-10 working days.

The delivery time of customized products is according to your requirement.
