Product Description

Full Height Door Gate Full Height Turnstile Gate Turnstile Barcode Scanner Gym Turnstile

Discriptions of Full Height Turnstile Gate:

Pedestrian Full height turnstiles are commonly used in high traffic areas such as rail transit, commercial buildings, enterprises and institutions, electronic factories, etc. They can achieve attendance, traffic management, security maintenance, etc. for enterprises

Features of Full Height Turnstile Gates:

1. You can choose multiple working modes and freely navigate while reading the card; Read the card while prohibiting entry.
2. The turnstile has a fault self checking function. If a fault occurs, it will automatically sound an alarm. It is very convenient for users to use and does not require regular inspections. Moreover, maintenance and upkeep are also very convenient.
3. When the card reading is valid, pedestrians only need to push the revolving door to enter, and after entering, the turnstile can reset itself.
4. It has the function of bidirectional power-off and free passage, which facilitates the evacuation of personnel in emergency situations; After connecting the power, the device will automatically restore its locked function.
5. The turnstile adopts a special transmission system, which can automatically lock the turnstile at zero position and make unlocking more reliable and accurate.
6. It can remotely control the switch, which can prevent the timely use of the fire protection system and other needs in case of a fire.
7. It can count the number of pedestrians and present it in an intuitive way, allowing managers to have a good understanding of the number of pedestrians in various directions.
8. It has a standardized and unified external electrical interface, can be connected to other read-write devices, and can be remotely managed and controlled through a computer system.
