## Product Description

### Luxury Black Swing Gate Turnstile Gyms Pedestrian Access Control System

#### Discriptions of Swing Barrier Gate:

The turnstile gate is a mechanical or electronic gate that controls access to a specific arealt typically consists of a vertical post with rotating arms or doors that allow only one person to pass through at a time. The gates are usually made of metal, with options for different finishes such as stainless steel or powder-coated colors.

Turnstile gates can be accessed by using a valid ticket, keycard, or authentication method such as facial recognition or fingerprint scanning. Once the user presents their credential, the gate unlocks and allows them to pass through. Some models also have a feature for detecting tailgating, where the gate remains locked until the previous user has fully passed through. The gates can be installed as standalone units or integrated with a larger access control system for a specific venue.

#### Features of Swing Barrier Turnstile Gates:

Multiple working modes are available

Alarm Function: Alarm for Illegal break-in, Follow, Passed overtime, or Device damaged.

Automatic unlocking function: automatically turn on when power failure.

Anti-collision and Automatic reset: When there have stronger force to collide the arm. It can open 3 degree bumper angle. This can reduce the motor damage and will reset automatically.

Anti-tail and Retrograde intrusion detection.
