

304 Stainless Steel Tripod Turnstile Gate with 550mm Passing Width

Our Product Introduction

for more products please visit us on turnstilebarriers.com

Basic Information

- Place of Origin: China
- Brand Name: SEWO
- Certification: CE ISO9001
- Model Number: SEWO-S1-200
- Minimum Order Quantity: 1 lane
- Price: Negotiable
- Packaging Details: wooden box
- Delivery Time: 5-7 working days
- Payment Terms: T/T, Western Union, MoneyGram, L/C, D/A, D/P
- Supply Ability: 2000 sets per month

Product Specification

- Product Name: Tripod Turnstile Gate
- Material: 304 Stainless Steel
- Warranty: 12 Months
- Passing Width: 550mm
- Size: 200*330*1000mm
- Passing Speed: 45 People/minute
- Power Supply: AC 220V
- Working Environment: Indoor/Outdoor (with A Tent Over)
- Keyword: Tripod Turnstile
- Odm/oem: Accepted
- Highlight: tripod turnstile gate with access control, professional turnstile gate for gym, construction site tripod turnstile gate

Product Description

Professional Tripod Turnstile Gate With Access Control System For Gym Construction Site

Discriptions of Automatic Tripod Turnstile:

SEWO fully automatic tripod turnstile is a high-tech access control management device that integrates machinery, electronics, microprocessor control, and various read/write technologies. It is designed for the automated management of pedestrian ingress and egress points. Its core features are:

Power Source: Powered by an internal motor that automatically drives the rotation of the three rotating arms (bars).

Control Method: Operation is controlled by a mainboard that receives signals from external devices such as ticket validators, access control controllers, or facial recognition terminals.

User Experience: Users are not required to push the arms. The turnstile unlocks and operates automatically upon valid credential verification, providing a smoother, more modern transit experience.

Key Features of Fully Automated Tripod Turnstile :

Fully Automated Operation: Motor-driven movement eliminates the need for manual pushing, enhancing user experience.
High Security: Combines mechanical anti-reverse mechanisms with electronic control to effectively prevent forced entry and tailgating.

Multiple Access Modes: Configurable for modes such as free passage (normally open), locked (normally closed), one-way controlled, or bidirectional controlled passage.

Powerful Integration Capabilities: Can interface with virtually all access control systems, ticketing systems, and biometric systems using standard communication protocols.

Accurate Counting Function: Built-in counters provide precise pedestrian traffic data.

Comprehensive Alarm Functions: Alarms are triggered for various events, including illegal intrusion, reverse passage, power failure, and system faults.

Fire Emergency Linkage: Upon receiving a fire alarm signal, the turnstile defaults to a free-passage state (arms unlock and can be pushed freely), ensuring unobstructed emergency egress.

Specifications of Turnstile Tripod Gate :

Product Name	Tripod Turnstile Gate Series
Model No.	SEWO-S1-200
Housing Material	SUS304 stainless steel
Swing Arm Material	304 stainless steel
Passing Width	550mm
Product Size(L*W*H)	200*330*1000 mm
Passing Speed	45 people/minute
Driving Motor	DC 24V Brushless motor
Working Voltage	220V
MCBF	≥ 5,000,000 times

Applications:

Due to their high security, durability, and effective management capabilities, fully automatic tripod turnstiles are widely used in:

Rail Transit: Ticket gates in subway and high-speed rail stations.

Government Facilities & Industrial Parks: Employee access control gates.

Attractions & Venues: Ticket validation checkpoints.

Construction Sites: Managed gates for worker attendance management.

Schools & Dormitories: Access management for students and staff.

Airports & Customs: Controlled access for specific secure areas.

1, What is the strength of your company in this industry?

Our company pays much attention to bringing and developing new technique and products since the foundation in 2003. Our brand "SEWO" has ranked among the top 10 famous brands of car parking systems and facilities in China.

2, What is the advantage products of your company?

Shenzhen Sewo Technology Ltd. Is a professional high-tech enterprise, which integrates the development, manufacturing, marketing, and service of Smart Parking Management System, Flap Barrier, Tripod Turnstile, Swing Gate, Parking Guidance System, Barrier Gate, Parking Lock, Access Control Systems and other related security products.

3, How about the quality of your product?

With our exquisite technology and strict quality testing system, we passed "CE" and "ISO9001:2008" international quality assessment standards. Our company also has won many honors, such as "China Top 10 Parking Management System Supplier", "AAA grade quality, service and prestige enterprise in China", and so on. Professional R&D team has strong capacity to be committed to continuously creating high quality products and service.

4, How about some customization request?

We support OEM / ODM service, more than 20 years industry experience will bring appropriate design for you, not only products, but also a smart access management solution expert.

5, Do you have agency for after-sales service?

Any question about products, you can find our sales anytime. We will provide life-time technology support. We have established many branch offices and gained much agents at home. Our sales and service network spreads all over the world. We also have extensive sales channels in Southeast Asia, the Middle East, Africa, Europe, and America. We warmly welcome customers or agents all over the world to join us to construct an intelligent, safe, convenient and harmonious society.

6, How about the delivery time?

Regular products need 5-10 working days.

The delivery time of customized products is according to your requirement.
