Basic Information

- Place of Origin: Guangdong, China
- Brand Name: SEWO
- Certification: CE Certified
- Model Number: CP360
- Minimum Order Quantity: 2

Product Specification

- Housing Dimension: 240x220x1500mm
- Housing Color: Gray, Yellow
- Offline Storage Capacity: 10000pcs (Extendible)
- Blacklist Capacity: 1000000pcs
- Card Capacity: 1000000pcs
- Working Temperature: 20 ~ 60
- Working Condition: Indoor / Outdoor
- Communication Interface: RS485, TCP/IP
- Installation Type: Surface-Mounting
- Recognition Type: ANPR/LPR/ALPR
- User Data Storage: 100,000 Users
- Entry/Exit Records: 100,000 Records
- Triggering Method: Virtual Coil Triggering
- Camera Resolution: 300 Million HD
- Display Connection: Direct Connect

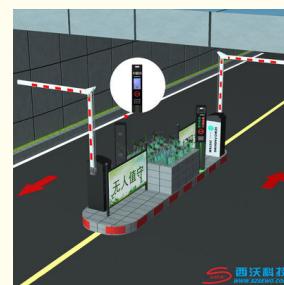

SEWO ALPR Parking Equipment

Model No.: SEWO-CP360

- ✓ Housing size: 240*220*1500mm
- ✓ 3 million HD LPR Camera
- ✓ built-in license plate recognition algorithm
- ✓ Support black-list and white-list
- ✓ Built-in voice broadcasting system
- ✓ Support offline running
- ✓ Replenishment lamp
- ✓ Support licence plate types: United States, Canada, Australia, European Union, Africa, Latin America, South America, etc. More than 100 countries or regions.

Product Description

SEWO RFID Automatic Intelligent Parking Lots Management System for Entrance and Exit Car Parking Payment Kiosk

Product Overview

The SEWO RFID Automatic Intelligent Parking Lots Management System X6 Series offers advanced ANPR/LPR/ALPR technology for efficient parking management. This system eliminates the need for manual card distribution, providing seamless vehicle access through automatic license plate recognition.

Key Advantages

- No need to stop vehicles for card collection - improves safety and efficiency
- Automatic boom barrier opening upon license plate recognition
- Real-time parking time and fee calculation
- Clear display of available spaces and parking fees
- 16 years of industry experience serving over 500,000 residential units
- Professional parking management software included

CP360 Parking Management System Features

- 300 million HD recognition with built-in control system
- Direct connection to displays and IC/RFID card readers
- Offline license plate recognition and vehicle access control
- Offline display with voice broadcast functionality
- Storage for 100,000 user data and parking records
- Supports virtual coil triggering recognition
